ANAS ELMOFTAHGY

Software Tester | Business Owner | Digital Marketer

Cairo, Egypt | +201095161970 | anaselmoftahgy1@gmail.com | linkedin.com/in/anas-elmoftahgy

PROFESSIONAL SUMMARY

Dynamic and entrepreneurial Software Tester with hands-on experience in business development, web design, and digital marketing. Currently pursuing a Computer Science degree, combining technical aptitude with practical business acumen. Proven ability to manage multiple responsibilities from technical testing to business operations while delivering user-focused, high-quality solutions. Passionate about merging technology with business strategy to create impactful digital products.

PROFESSIONAL EXPERIENCE

Business Owner / Software Tester | *Wandy (Local Brand) — Self-Employed* | Ongoing

- Founded and manage Wandy, a local brand, overseeing all aspects of business operations including business development, sales, and brand strategy.
- Lead web design and development initiatives using Figma and WordPress to enhance online presence and user experience.
- Develop and execute digital marketing campaigns via Meta Business Suite and Google Ads to drive brand awareness, customer engagement, and sales growth.
- Apply software testing fundamentals to ensure quality across digital products and web deployments.
- Manage end-to-end project lifecycle from conceptualization to launch, adapting strategies based on market feedback.

EDUCATION

Bachelor of Science, Computer Science | *Arab Open University (AOU) — Egypt Branch* | Expected 2029

Relevant coursework: Software Engineering, Data Structures, Web Development, Database Systems

Software Development – Software Tester Track | *Digital Egypt Pioneers Initiative (DEPI) — Ministry of Communications & IT* | Dec 2025 – Jul 2026

Intensive government-backed program covering: Prompt Engineering, Java Programming Fundamentals, Fundamentals of Testing (ISTQB 4), Testing Throughout the Software Development Life Cycle (ISTQB 4), Static Testing Techniques (Jira), Test Tools (Postman, Selenium), Test Analysis & Design, Managing Test Activities (Database and Agile), Capstone Project.

CERTIFICATIONS

Digital Egypt Pioneers Program — Software Development, Software Tester	Digital Egypt Pioneers Initiative (DEPI) — Ministry of Communications & IT *Dec 2025 – Jul 2026*
Dell Technologies Summer Technology Internship 2026	Dell Technologies Egypt
Fundamentals and Applications in Artificial Intelligence	British University in Egypt (BUE) — Faculty of Engineering *12 Hours*
AI Fundamentals	Google / Coursera
Introduction to AI	Google / Coursera
Start Writing Prompts like a Pro	Google / Coursera
Foundations of Cybersecurity	Google / Coursera
Foundations: Data, Data, Everywhere	Google / Coursera
Foundations of Digital Marketing & E-commerce	Google / Coursera

Foundations of UX Design	Google / Coursera
Software Testing, Deployment & Maintenance Strategies	IBM / Coursera
Fundamentals of Digital Marketing	Google Digital Garage

TECHNICAL SKILLS

Software Testing: Test planning, functional testing, deployment strategies, maintenance, bug tracking
Web & Design: Figma, WordPress, HTML/CSS, UX Design principles, user research
Digital Marketing: SEO, Google Ads, Meta Business Suite, e-commerce, content marketing, prompt engineering
AI & Data: AI fundamentals, data analysis foundations, prompt writing, cybersecurity awareness
Business: Sales strategy, brand development, project management, market analysis

CORE COMPETENCIES

Communication & Negotiation | Leadership & Team Management | Adaptability & Problem-Solving | Strategic Thinking & Planning | Ability to Work Under Pressure | Strong Interpersonal Skills

LANGUAGES

Arabic: Native | **English:** Professional Working Proficiency

KEY PROJECTS & ACHIEVEMENTS

- Successfully launched and scaled Wandy, applying both technical and business skills to build a recognizable local brand with a measurable digital presence.
- Completed 11 industry certifications from Google, IBM, Dell Technologies, and the British University in Egypt, covering AI, cybersecurity, data analytics, UX design, digital marketing, software testing, and applied AI.
- Graduated from the Digital Egypt Pioneers Initiative (DEPI) — a competitive government-backed program — completing the Software Tester track with hands-on training in ISTQB 4, Selenium, Postman, Jira, and Agile methodologies (December 2025 – July 2026).
- Continuously integrating Computer Science academic projects with real-world business challenges to develop practical, market-ready digital solutions.

Fore. — AI-Powered Personal Finance Management App | *Dell Technologies Summer Technology Internship 2026*

Contributed to the research, concept development, and presentation of Fore., a proposed AI-powered personal finance management application designed for young adults. The project was developed collaboratively as part of the Dell Technologies Summer Technology Internship 2026.

- Participated in defining the product concept: a proactive financial tool focused on preventing overspending before it happens, rather than only tracking past spending.
- Contributed to scoping key proposed features including an AI Financial Coach, personalized saving plans and financial goals, spending pattern analysis, future spending prediction, and early overspending warnings.
- Helped define the user experience concept around an AI chatbot that responds based on the user's actual budget and live spending forecast — adapting advice in real time.
- Contributed to the product privacy and security framework concept, covering read-only financial data access, encryption, and on-device AI processing principles.
- Participated in designing the transaction management concept: automated transaction classification and Receipt OCR scanning supporting both Arabic and English receipts.
- Supported the team in structuring the Financial Health Score concept — a composite indicator to help users understand their overall financial wellbeing at a glance.
- Contributed to the internship team presentation, communicating the product vision, proposed technical architecture (React Native / Flutter, cloud infrastructure, predictive forecasting models), and user value proposition to Dell Technologies stakeholders.

DEPI Capstone Project: SauceDemo — Swag Lab | *March – April 2026*

End-to-end software testing project for the SauceDemo (Swag Lab) web application, conducted as part of the DEPI Software Tester track. Collaborated in a team of 5 across a 20-day structured sprint (80 hours total).

- Performed Static Testing: requirements and design review across all 9 user stories (Login, Product Sorting, Cart Management, Checkout, Logout).
- Executed Manual Testing: created and executed test cases, filed bug reports, and produced test summary reports for web environments (Chrome, Safari).
- Conducted Mobile Testing on Android and iOS platforms; produced full test case documentation and bug reports.
- Performed API Testing: designed and executed API test cases, reported defects, and delivered test summary documentation.
- Built and ran Automation Testing scripts; documented results and contributed to the consolidated master project folder handoff.
- Covered risk assessment including tight deadlines, team availability, and collaboration alignment across 5 testing streams.
